Electric towel rail PILLAR 2+3

The vertical design with two or three bars offers more drying space and also makes a stronger visual impression than the classic single-bar version. The parallel lines create a clean, balanced look that naturally complements a modern bathroom. The stainless steel construction ensures consistent performance and even heating. Digital controls allow for easy adjustment of temperature and heating time; installation is possible via a wall outlet or by connecting to the wall using an adapter.

Concealed connection kit for electric towel rails

This adapter allows direct and aesthetically clean connection of electric towel rails directly into the wall, without a visible power cable. It is designed for models with pipe diameters smaller than 32 mm (mini electric ladders and mini heating bars). Thanks to its compatibility with flush-mounted electrical boxes, it ensures a safe, discreet and professional connection. The adapter is available in colors to match the design of the heating elements.
